PRESS RELEASE

Insurers' Response to Hurricane Irma Losses

The members of ATTIC empathize with the populations of those islands which have been adversely affected by the calamitous events and destruction brought about by the passage of Hurricane Irma throughout the Caribbean. ATTIC wishes to assure policyholders that our members stand ready to fulfil their obligations under their respective policies.

Despite the current disruptions to the usual communication channels in the various islands, our members are currently working to implement various options to make it easy and convenient for policyholders to provide them with an initial report of their claim in order to expedite settlements.

Though the rebuilding process may be long and arduous, our members are committed to working with their policyholders and other stakeholders to bring restoration to their islands and communities.
